# **Academic Program and Course Description Guide**

**2024**

## **Introduction:**

**The educational program is a well-planned set of courses that include procedures and experiences arranged in the form of an academic syllabus. Its main goal is to improve and build graduates' skills so they are ready for the job market. The program is reviewed and evaluated every year through internal or external audit procedures and programs like the External Examiner Program.**

**The academic program description is a short summary of the main features of the program and its courses. It shows what skills students are working to develop based on the program's goals. This description is very important because it is the main part of getting the program accredited, and it is written by the teaching staff together under the supervision of scientific committees in the scientific departments.**

**This guide, in its second version, includes a description of the academic program after updating the subjects and paragraphs of the previous guide in light of the updates and developments of the educational system in Iraq, which included the description of the academic program in its traditional form (annual, quarterly), as well as the adoption of the academic program description circulated according to the letter of the Department of Studies T 3/2906 on 3/5/2023 regarding the programs that adopt the Bologna Process as the basis for their work.**

**In this regard, we can only emphasize the importance of writing an academic programs and course description to ensure the proper functioning of the educational process.**

### **Concepts and terminology:**

**Academic Program Description:** The academic program description provides a brief summary of its vision, mission and objectives, including an accurate description of the targeted learning outcomes according to specific learning strategies.

**Course Description:** Provides a brief summary of the most important characteristics of the course and the learning outcomes expected of the students to achieve, proving whether they have made the most of the available learning opportunities. It is derived from the program description.

**Program Vision:** An ambitious picture for the future of the academic program to be sophisticated, inspiring, stimulating, realistic and applicable.

**Program Mission:** Briefly outlines the objectives and activities necessary to achieve them and defines the program's development paths and directions.

**Program Objectives:** They are statements that describe what the academic program intends to achieve within a specific period of time and are measurable and observable.

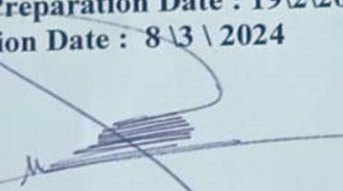

**Curriculum Structure:** All courses / subjects included in the academic program according to the approved learning system (quarterly, annual, Bologna Process) whether it is a requirement (ministry, university, college and scientific department) with the number of credit hours.

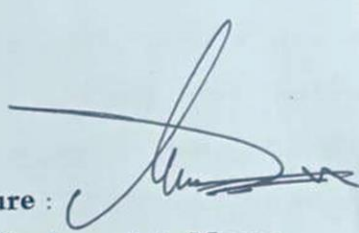

**Learning Outcomes:** A compatible set of knowledge, skills and values acquired by students after the successful completion of the academic program and must determine the learning outcomes of each course in a way that achieves the objectives of the program.

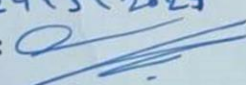

**Teaching and learning strategies:** They are the strategies used by the faculty members to develop students' teaching and learning, and they are plans that are followed to reach the learning goals. They describe all classroom and extra-curricular activities to achieve the learning outcomes of the program.

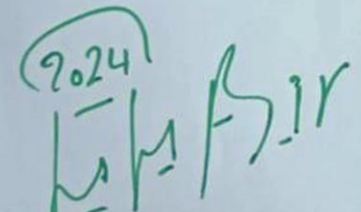

**Academic Program Description Form**

**University Name : Al-Furat Al-Awsat Technical University**  
**Faculty/Institute : Al-Mussaib Technical Institute**  
**Scientific Department : Animal Production Techniques**  
**Academic or Professional Program Name : ABET**  
**Final Certificate Name : Technical Diploma**  
**Academic System : Semester**  
**Description Preparation Date : 19\2\2024**  
**File Completion Date : 8\3\2024**

**Signature :**   
**Head of Department Name:**  
**Assistant Professor Doctor**  
**Marwan Zuher Rijib**  
**Date :19\ 2 \ 2024**

**Signature :**   
**Scientific Associate Name:**  
**Lecturer**  
**Mohammed Hadi Sabri**  
**Date :19\ 2 \ 2024**

**The file is checked by: Aws Mahmoud Kreet**  
**Department of Quality Assurance and University Performance**  
**Director of the Quality Assurance and University Performance Department:**

**Approval of the Dean**  
**Prof.Dr.**  
**Jabbar Abbas Jaber**

### 1. Program Vision

Program vision is written here as stated in the university's catalogue and website.

### 2. Program Mission

Program mission is written here as stated in the university's catalogue and website.

### 3. Program Objectives

- 1- The link between animal production and food security for the country
- 2- Learn about the manufacture of animal products from meat and milk
- 3- Learn how to create large animal fields and poultry fields, create fish lakes
- 4- Learn about the environment of large animals, poultry and fish farming
- 5- Learn about ways to provide water and healthy food and daily field work for animals
- 6- Identifying, preventing and treating various animal diseases

### 4. Program Accreditation

Does the program have program accreditation? And from which agency?

### 5. Other external influences

It is directly related to the labor market

### 6. Program Structure

Program Structure	Number of Courses	Credit hours	Percentage	Reviews*
Institution Requirements				
College Requirements				
Department Requirements				

<b>Summer Training</b>				
<b>Other</b>				

\* This can include notes whether the course is basic or optional.

<b>7. Program Description</b>				
<b>Year/Level</b>	<b>Course Code</b>	<b>Course Name</b>	<b>Credit Hours</b>	
			<b>theoretical</b>	<b>Practical</b>
<b>First year</b>		<b>fall semester</b>	<b>180</b>	<b>300</b>
<b>First year</b>		<b>spring semester</b>	<b>195</b>	<b>270</b>
<b>Second Year</b>		<b>fall semester</b>	<b>150</b>	<b>315</b>
<b>Second Year</b>		<b>spring semester</b>	<b>165</b>	<b>285</b>

<b>8. Expected learning outcomes of the program</b>	
<b>Knowledge</b>	
<b>Learning Outcomes 1</b>	<b>Learning Outcomes Statement 1</b>
<b>Skills</b>	
<b>Learning Outcomes 2</b>	<b>Learning Outcomes Statement 2</b>
<b>Learning Outcomes 3</b>	<b>Learning Outcomes Statement 3</b>
<b>Ethics</b>	
<b>Learning Outcomes 4</b>	<b>Learning Outcomes Statement 4</b>
<b>Learning Outcomes 5</b>	<b>Learning Outcomes Statement 5</b>

<b>9. Teaching and Learning Strategies</b>
<b>Teaching and learning strategies and methods adopted in the implementation of the program in general.</b>

<b>10. Evaluation methods</b>
<b>Implemented at all stages of the program in general.</b>

<b>11. Faculty</b>
<b>Faculty Members</b>

Academic Rank	Specialization		Special Requirements/Skills (if applicable)		Number of the teaching staff	
	General	Special			Staff	Lecturer

<b>Professional Development</b>
<b>Mentoring new faculty members</b>
Briefly describes the process used to mentor new, visiting, full-time, and part-time faculty at the institution and department level.
<b>Professional development of faculty members</b>
Briefly describe the academic and professional development plan and arrangements for faculty such as teaching and learning strategies, assessment of learning outcomes, professional development, etc.

<b>12. Acceptance Criterion</b>
(Setting regulations related to enrollment in the college or institute, whether central admission or others)
The student's average upon graduating from middle school (50-55)%
Branch (scientific + agricultural).
There are no admission exams in the department and they depend on desire.

<b>13. The most important sources of information about the program</b>
State briefly the sources of information about the program.
1- Methodological books, auxiliary manuals, and the Internet
2- Corresponding programs in Iraqi and international universities
3- Modern scientific research

<b>14. Program Development Plan</b>
Providing academic support capabilities in organizing field visits
- Providing an appropriate classroom environment that enables the teacher to diversify teaching strategies
- Providing information technology in the campus library
- Hosting experts from outside the institute, or from the work environment for which they are preparing, to benefit from their expertise in developing the course according to the actual need of the labor market.

Please tick the boxes corresponding to the individual program learning outcomes under evaluation.

Program Skills Outline															
				Required program Learning outcomes											
Year/Level	Course Code	Course Name	Basic or optional	Knowledge				Skills				Ethics			
				A1	A2	A3	A4	B1	B2	B3	B4	C1	C2	C3	C4
second		animal physiology	basic	*				*				*			
		Animal breeding	basic	*					*			*			
second		poultry diseases	basic		*				*						
first		Poultry feeding	basic	*				*					*		
		Dairy cattle production	basic		*				*					*	
first		Animal health	basic		*				*					*	
		Fish Breeding	Basic	*					*				*		

## Course Description Form

This course description provides a brief summary of the most important characteristics of the course and the learning outcomes expected of the student to achieve, demonstrating whether he has made the most of the available learning opportunities. It must be linked to the description of the program.

1. Course Name : Sheep and goat production

2. Course Code:

3. Semester / Year : / fall semester

4. Description Preparation Date : 2024

5. Available Attendance Forms : Section

6. Number of Credit Hours (Total) / 75

7. Course administrator's name (mention all, if more than one name)

Name:

Email:

8. Course Objectives

Course Objectives

Teaching the student about the most important international and local sheep breeds (meat, milk, and wool sheep). Identifying sexual maturity, the breeding season, methods of controlling the timing of shedding, the properties and characteristics of wool, morphological anatomy, the period of pregnancy and birth, care of ewes the origin of goats, and their classification.

9. Teaching and Learning Strategies

Strategy

A- Cognitive objectives

1- Identifying local sheep breeds

2- Learn about daily and seasonal field operations for sheep and goats

3- The possibility of establishing a herd, choosing the appropriate breed, the size of the herd, and the date

of purchasing sheep and goats.

4- Identifying sheep pens, their requirements and types

4- Learn how to carry out the breastfeeding process care for newborns and their weights, and prepare feeders and waterers.

5- Identifying the reasons for the death of some lambs

7- Learn how to estimate age in sheep using teeth

**B - The skills objectives of the course.**

1. Conducting the process of shearing and dipping animals

2. Carrying out the birth process for sheep

3. Conduct feeding, watering, and health monitoring of animals

4. Establishing the herd in terms of choosing a location and purchasing animals

**Teaching and learning methods**

1. Scientific lecture.

2. Discussion among students.

3. Preparing reports related to the lecture

**Evaluation methods**

1. Daily exams

2. Ask some questions

3. Giving homework

**C- Emotional and value goals**

1. Benefit from scientific material in understanding the course of events.

2. The ability to deal with urgent developments.

3. Choose the optimal solution from among the available solutions and options.

4. The ability to lead and confront challenges.

5. Developing students' abilities to analyze the content of social variables to identify thinking skills and problem-solving skills.

**Teaching and learning methods**

Lectures, identifying and diagnosing problems through explanations, exercises, and classroom exercises, and practical applications so that students understand how to benefit from the specifications used and understand their application.

**Evaluation methods**

Direct questions, daily exams, stimulating students and

pushing them to actively participate, discussing lecture additional activities, semester exams, and actual attendance.

**D - Transferable general and qualifying skills (other skill related to employability and personal development).**

- 1. Improving their intellectual skills**
- 2. Raising their conceptual perceptions and moving the student from the stage of teaching to learning**
- 3. The tendency to cooperate and work together**

## 10. Course Structure

Week	Hours	Required Learning Outcomes	Unit or subject name	Learning method	Evaluation method
First	2+3 +	Scientific basis for classifying sheep	Scientific basis for classifying sheep	Continuous guidance of students by the professor during the lecture	questions and answers
Second	2+3	Breeds of sheep for meat, milk and wool	Breeds of sheep for meat, milk and wool	Lecture and discussion	Asking questions
Third	2+3	Reproduction and fertilization in sheep and reproductive systems	Reproduction and fertilization in sheep and reproductive systems	Lecture and discussion	Listening
Fourth	2 +3	Sexual puberty, the breeding season, and ways to control the timing of mating	Sexual puberty, the breeding season, and ways to control the timing of mating	Lecture and discussion	Ask questions
Fifth	2 +3	The period of pregnancy, childbirth, and care of ewes before and after birth	The period of pregnancy, childbirth, and care of ewes before and after birth	Lecture and discussion	Case study

<b>Sixth</b>	<b>2+3</b>	<b>Growth and development of sheep</b>	<b>Growth and development in sheep</b>	<b>Lecture and discussion</b>	<b>Asking questions</b>
<b>Seventh</b>	<b>2+3</b>	<b>Milk production in sheep and factors affecting milk production</b>	<b>Milk production in sheep and factors affecting milk production</b>	<b>Lecture and discussion</b>	<b>Mini lesson</b>
<b>Eighth</b>	<b>2+3</b>	<b>Properties and features of wool and morphological anatomy</b>	<b>Properties and features of wool and morphological anatomy</b>	<b>Lecture and discussion</b>	<b>discussion</b>
<b>Ninth</b>	<b>2 +3</b>	<b>Stages of wool fiber growth and wool gradation</b>	<b>Stages of wool fiber growth and wool gradation</b>	<b>Lecture and discussion</b>	<b>Case study</b>
<b>Tenth</b>	<b>2+3</b>	<b>The origin, classification, and location of goats in the animal kingdom</b>	<b>The origin, classification, and location of goats in the animal kingdom</b>	<b>Lecture and discussion</b>	<b>Listening and asking questions</b>
<b>Eleventh</b>	<b>2+3</b>	<b>Breeds of sheep for meat</b>	<b>Breeds of sheep for meat</b>	<b>Lecture and discussion</b>	<b>Listening and asking questions</b>
<b>Twelfth</b>	<b>2+3</b>	<b>Goat breeds in the world</b>	<b>Goat breeds in the world</b>	<b>Lecture and discussion</b>	<b>Case study</b>
<b>Thirteenth</b>	<b>2+3</b>	<b>Goat reproduction, puberty and sexual maturity</b>	<b>Goat reproduction, puberty and sexual maturity</b>	<b>Lecture and discussion</b>	<b>Discussion</b>
<b>fourteenth</b>	<b>2+3</b>	<b>Milk, hair and skin production in goats</b>	<b>Milk, hair and skin production in goats</b>	<b>Lecture and discussion</b>	<b>Case study</b>
<b>Fifteenth</b>	<b>2 +3</b>	<b>The future of sheep industry and intensive production</b>	<b>The future of sheep industry and intensive production</b>	<b>Listening and asking questions</b>	<b>Case study</b>

### 11. Course Evaluation

Distributing the score out of 100 according to the tasks assigned to the student such as daily preparation, daily oral, monthly, or written exams, reports .... etc

**12.Learning and Teaching Resources**

<b>Required textbooks (curricular books, if any)</b>	<b>Curriculum</b>
<b>Main references (sources)</b>	<b>Sheep and goat production Zuhair Fakhri - Jalal Elia Al-Qass 1984</b>
<b>Recommended books and references (scientific journals, reports...)</b>	
<b>Electronic References, Websites</b>	

**12. Course development plan**

**\* Providing academic support capabilities in organizing field visits**

**\* Providing an appropriate classroom environment that enables the teacher to diversify teaching strategies**

**\* Providing information technology in the campus library**

**\* Hosting experts from outside the institute, or from the work environment for which they are preparing, to benefit from their expertise in developing the course according to the actual need of the labor market**

**Course Description Form**

**This course description provides a brief summary of the most important characteristics of the course and the learning outcomes expected of the student to achieve, demonstrating whether he has made the most of the available learning opportunities. It must be linked to the description of the program.**

**13.Course Name : poultry production**

**14.Course Code:**

**15.Semester / Year : / fall semester**

**16.Description Preparation Date : 2024**

**17.Available Attendance Forms : Section**

**18. Number of Credit Hours (Total) / 75****19. Course administrator's name (mention all, if more than one name)****Name:****Email:****20. Course Objectives****Course Objectives****Course objectives:**

**Introducing the student to the types and recipes of poultry hatching, hatchery management, and maintaining poultry fields.**

**Anatomy of the internal systems (digestion, breathing, reproductive systems of chickens), natural and artificial hatching, and types of hatcheries..**

**21. Teaching and Learning Strategies****A- Cognitive objectives**

- 1- Identifying methods of managing poultry fields**
- 2- Identify the important factors that affect artificial hatching**
- 3- Learn about the anatomy of the internal organs of poultry**
- 4- Identify the types of poultry and their breeds**

**B - The skills objectives of the course.**

- 1. Conducting artificial hatching**
- 2. Analyze and dissect poultry to view the various internal systems**
- 3. Preparing and operating hatcheries, specifications of a typical hatchery**
- 4. Learn about methods of raising turkey chickens and ducks**

**Teaching and learning methods**

- 1. Scientific lecture.**
- 2. Discussion among students.**
- 3. Preparing reports related to the lecture**

**Evaluation methods**

- 1. Daily exams**
- 2. Ask some questions**
- 3. Giving homework**

#### **C- Emotional and value objectives**

- 1. Benefit from scientific material in understanding the course of events.**
- 2. The ability to deal with urgent developments.**
- 3. Choose the optimal solution from among the available solutions and options.**
- 4. The ability to lead and confront challenges.**
- 5. Developing students' abilities to analyze the content of social variables to identify thinking skills and problem-solving skills.**

#### **Teaching and learning methods**

**Lectures, identifying and diagnosing problems through explanations, exercises, and classroom exercises, and practical applications so that students understand how to benefit from the specifications used and understand their application.**

#### **Evaluation methods**

**Direct questions, daily exams, stimulating students and pushing them to actively participate, discussing lectures, additional activities, semester exams, and actual attendance.**

#### **D - Transferable general and qualifying skills (other skills related to employability and personal development).**

- 1. Improving their intellectual skills**
- 2. Raising their conceptual perceptions and moving the student from the stage of teaching to learning**
- 3. The tendency to cooperate and work**

### 10. Course structure

<b>the week</b>	<b>Hours</b>	<b>Required learning outcomes</b>	<b>Unit name and/or topic</b>	<b>education method</b>	<b>Evaluation method</b>
<b>first</b>	<b>3 + 2</b>	<b>The importance of the poultry industry in Iraq and the international companies producing breeds of meat chickens and egg chickens</b>	<b>The importance of the poultry industry in Iraq and the international companies producing breeds of meat chickens and egg chickens</b>	<b>Continuous guidance of students by the professor during the lecture</b>	<b>questions and answers</b>

### **Course Description Form**

**This course description provides a brief summary of the most important characteristics of the course and the learning outcomes expected of the student to achieve, demonstrating whether he has made the most of the available learning opportunities. It must be linked to the description of the program.**

**Course Name : Dairy cattle**

**Course Code:**

**Semester / Year : / fall semester**

**Description Preparation Date : 2024**

**Available Attendance Forms : Section**

**24. Number of Credit Hours (Total) / 60**

**Course administrator's name (mention all, if more than one name)**

**Name:**

**Email:**

**Course Objectives**

**Course Objectives**

**Course objectives:**

**The course aims to give a general idea about the importance of dairy cattle, the anatomy and physiology of the udder, hormones, and milk secretion.**

**25. Teaching and Learning Strategies**

**9- Course outcomes and teaching, learning and evaluation methods**

**A- Knowledge and understanding of the principles of animal production.**

**A- Cognitive objectives**

**A1- The possibility of working in agricultural land projects**

**A2- The possibility of working in milk production livestock fields**

**A3- Managing dairy cattle care and nutrition projects**

**A4- The possibility of genetic improvement of dairy cattle herds**

**B - The skills objectives of the course.**

**B1 - Conduct daily and seasonal field operations**

**B2 - Using production field records.**

**B3 - Learning how to create tables for judging animals.**

**B4- Learning how to dry milk animals**

**Teaching and learning methods**

**Lecture, laboratory, systematic training, summer training**

**Evaluation methods**

**(Oral and written exams, semester and final exams, and daily evaluation).**

**C- Emotional and value objectives**

**C1- Planning and adopting successful ideas**

**C2- Adopting future visions in the field of specialization**

**C3- Mastering field work for dairy cattle field management projects**

**C4- Mastering field work in dairy cattle fields**

**D - General and qualifying transferable skills (other skills related to employability and personal development).**

**D1- The possibility of working in dairy cattle breeding projects**

**D2- The possibility of working on raising and improving dairy cattle  
Lectures, identifying and diagnosing problems through explanations, exercises, and classroom exercises, and practical applications so that students understand how to benefit from the specifications used and understand their application.**

**Evaluation methods**

**Direct questions, daily exams, stimulating students and pushing them to actively participate, discussing lectures, additional activities, semester exams, and actual attendance.**

**D - Transferable general and qualifying skills (other skills related to employability and personal development).**

- 1. Improving their intellectual skills**
- 2. Raising their conceptual perceptions and moving the student from the stage of teaching to learning**
- 3. The tendency to cooperate and work**

## 11. Course structure

the week	hours	Required learning outcomes	Unit name and/or topic	education method	Evaluation method
first	3 + 1	Factors affecting the increase and decrease in milk levels	Factors affecting the increase and decrease in milk levels	A lecture	Questions and answers
Second	3 + 1	Dairy cattle breeds	Dairy cattle breeds	A lecture	Oral evaluation
Third	3 + 1	Iraqi livestock and their milk production	Iraqi livestock and their milk production	A lecture	Student discussion
Fourth	3 + 1	Care and feeding of dairy cattle	Care and feeding of dairy cattle	A lecture	A short exam
Fifth	3 + 1	International and Iraqi buffalo types	International and Iraqi buffalo types	A lecture	questions and answers
Sixth	3 + 1	Milk production in buffalo	Milk production in buffalo	Lecture and discussion	short exam
Seventh	3 + 1	Camels and milk production	Camels and milk production	Lecture and discussion	questions and answers
Eighth	3 + 1	Installation and physiology of the udder	Installation and physiology of the udder	a lecture	Student discussion
Ninth	3 + 2	Hormones and their effect on milk secretion	Hormones and their effect on milk secretion	a lecture	questions and answers

<b>Tenth</b>	<b>3 + 1</b>	<b>Factors affecting milk production in terms of chemical composition</b>	<b>Factors affecting milk production in terms of chemical composition</b>	<b>Lecture and discussion</b>	<b>short exam</b>

## Course Description Form

**This course description provides a brief summary of the most important characteristics of the course and the learning outcomes expected of the student to achieve, demonstrating whether he has made the most of the available learning opportunities. It must be linked to the description of the program.**

**Course Name : Animal Health**

**Course Code:**

**Semester / Year : / spring semester**

**Description Preparation Date : 2024**

**Available Attendance Forms : Section**

**Number of Credit Hours (Total) / 75**

**Course administrator's name (mention all, if more than one name)**

**Name:**

**Email:**

### **Course Objectives**

**Course Objectives**

**Course objectives:**

**Teaching the student about the health conditions that may be available in (air, drinking water, and environmental conditions in animal pens) and the health importance of its components (air pollutants, dust infection, ventilation, and the role of water in transmitting pathogens and draining waste and liquids from pens)**

### **Teaching and Learning Strategies**

**9- Course outcomes and teaching, learning and evaluation methods**

**A- Knowledge and understanding of the principles of animal production.**

**A- Cognitive objectives**

**1- Identifying environmental conditions suitable for animal health**

**2- Identify the causes of diseases and infections that affect animals**

**3- Identifying healthy ways to dispose of waste in barns**

**4- Identify the general specifications of livestock barn systems**

**5- Identify the general specifications of milking parlors**

**B - The skills objectives of the course.**

**1. Identify methods for measuring microbial pollution in the air**

**2. Learn about methods for estimating humidity**

**3. Microscopic and bacteriological examination of drinking water**

#### **4 Methods of using pesticides, immersion and baths, dangers of immersion**

##### **Teaching and learning methods**

- 1. Scientific lecture.**
- 2. Discussion among students.**
- 3. Preparing reports related to the lecture**

##### **Evaluation methods**

- 1. Daily exams**
- 2. Ask some questions**
- 3. Giving homework**

##### **C- Emotional and value goals**

- 1. Benefit from scientific material in understanding the course of events.**
- 2. The ability to deal with urgent developments.**
- 3. Choose the best solution from among the available solutions and options.**
- 4. The ability to lead and confront challenges.**
- 5. Developing students' abilities to analyze the content of social variables to identify thinking skills and problem-solving skills.**

##### **Teaching and learning methods**

**Lectures, identifying and diagnosing problems through explanations, exercises, and classroom exercises, and practical applications so that students understand how to benefit from the specifications used and understand their application.**

##### **Evaluation methods**

**Direct questions, daily exams, stimulating students and pushing them to actively participate, discussing lectures, additional activities, semester exams, and actual attendance.**

**D - Transferable general and qualifying skills (other skills related to employability and personal development).**

- 1. Improving their intellectual skills**
- 2. Raising their conceptual perceptions and moving the student from the stage of teaching to learning**
- 3. The tendency to cooperate and work together**

## 12. Course structure

the week	hours	Required learning outcomes	Unit name and/or topic	education method	Evaluation method
first	3 + 2	Air, the health importance of air component air pollutants inside animal housing and their health importance	Air, the health importance of air components, air pollutants inside animal housing and their health importance	Continuous guidance of students by the professor during the lecture	Questions and answers
Second	3 + 2	The role of air transmitting pathogens, droplet infection, dust infection, and the health importance of air speed, sun, and light.	The role of air in transmitting pathogens, droplet infection, dust infection, and the health importance of air speed, sun, and light.	Lecture and discussion	Oral evaluation
Third	3 + 2	Ventilation, air exchange and air volume, ventilation methods in animal housing	Ventilation, air exchange and air volume, ventilation methods in animal housing...	Lecture and discussion	Student discussion
Fourth	3 + 2	Water, water sources: rainwater, surface water, seas and groundwater...	Water, water sources: rainwater, surface water, seas and groundwater.	Lecture and discussion	A short exam

<b>Fifth</b>	<b>3 + 2</b>	<b>Sanitary conditions that must be met in drinking water and watering animals</b>	<b>Sanitary conditions that must be met in drinking water and watering animals</b>	<b>a lecture</b>	<b>questions and answers</b>
<b>Sixth</b>	<b>3 + 2</b>	<b>The role of water in transmitting pathogens, pathogenic microbes, animal parasites and chemical toxins</b>	<b>The role of water in transmitting pathogens, pathogenic microbes, animal parasites, and chemical toxins</b>	<b>Lecture and discussion</b>	<b>short exam</b>
<b>Seventh</b>	<b>3 + 2</b>	<b>Purifying drinking water, the purpose of which is natural and artificial purification, including the addition of chloride, trace element powder and potassium permanganate</b>	<b>Purifying drinking water, the purpose of which is natural and artificial purification, including the addition of chloride, trace element powder, and potassium permanganate.</b>	<b>Discussion and mini-lesson</b>	<b>questions and answers</b>
<b>Eighth</b>	<b>3 + 2</b>	<b>Animal pens, building location, roof construction and thermal insulation</b>	<b>Animal pens, building location, roof construction and thermal insulation</b>	<b>Lecture and discussion</b>	<b>Student discussion</b>
<b>Ninth</b>	<b>3 + 2</b>	<b>Drainage of waste and liquids from pens and the</b>	<b>Drainage of waste and liquids from pens and the liquid manure reservoir,</b>	<b>Lecture and discussion</b>	<b>questions and answers</b>

		liquid manure reservoir, drain pipes and traps	drain pipes and traps		
<b>Tenth</b>	<b>3 + 2</b>	<b>Healthy ways to dispose of waste from barns</b>	<b>Healthy ways to dispose of waste from barns</b>	<b>Lecture and discussion</b>	<b>short exam</b>
<b>Eleventh</b>	<b>3 + 2</b>	<b>Air, the health importance of air component air pollutants inside animal housing and their health importance</b>	<b>Air, the health importance of air components, air pollutants inside animal housing and their health importance</b>	<b>a lecture</b>	<b>questions and answers</b>
<b>Twelfth</b>	<b>3 + 2</b>	<b>The role of air transmitting pathogens, droplet infection, dust infection, and the health importance of air speed, sun, and light.</b>	<b>The role of air in transmitting pathogens, droplet infection, dust infection, and the health importance of air speed, sun, and light.</b>	<b>Lecture and discussion</b>	<b>short exam</b>
<b>thirteenth</b>	<b>3 + 2</b>	<b>Ventilation, air exchange and air volume, ventilation methods in animal housing</b>	<b>Ventilation, air exchange and air volume, ventilation methods in animal housing...</b>	<b>a lecture</b>	<b>questions and answers</b>
<b>fourteenth</b>	<b>3 + 2</b>	<b>Water, water sources: rainwater, surface water, seas and groundwater...</b>	<b>Water, water sources: rainwater, surface water, seas and groundwater.</b>	<b>Lecture and discussion</b>	<b>questions and answers</b>

<b>Fifteenth</b>	<b>3 + 2</b>	<b>Sanitary conditions that must be met in drinking water and watering animals</b>	<b>Sanitary conditions that must be met in drinking water and watering animals</b>	<b>a lecture</b>	<b>short exam</b>
------------------	--------------	--	--	------------------	-------------------

### **28.Course Evaluation**

**Distributing the score out of 100 according to the tasks assigned to the student such as daily preparation, daily oral, monthly, or written exams, reports .... etc**

### **29.Learning and Teaching Resources**

<b>Required textbooks (curricular books, if any)</b>	<b>Curriculum</b>
<b>Main references (sources)</b>	<b>Animal Health Dr. Mahmoud Ahmed Nadim + Saadi Ahmed Ghannawi 1982</b>
<b>Recommended books and references (scientific journals, reports...)</b>	<b>Basics of veterinary medicine Dr. Wahab Amin Hassan 1990</b>
<b>Electronic References, Websites</b>	<b>Specialized websites</b>

### **12. Course development plan**

- \* Providing academic support capabilities in organizing field visits**
- \* Providing an appropriate classroom environment that enables the teacher to diversify teaching strategies**
- \* Providing information technology in the campus library**
- \* Hosting experts from outside the institute, or from the work environment for which they are preparing, to benefit from their expertise in developing the course according to the actual need of the labor market**

### **Course Description Form**

**This course description provides a brief summary of the most important characteristics of the course and the learning outcomes expected of the student to achieve, demonstrating whether he has made the most of the available learning opportunities. It must be linked to the description of the program.**

**Course Name : fish breeding**

**Course Code:**

**Semester / Year : / spring semester**

**Description Preparation Date : 2024**

**Available Attendance Forms : Section**

**Number of Credit Hours (Total) / 75**

**Course administrator's name (mention all, if more than one name)**

**Name:**

**Email:**

### **Course Objectives**

**Course Objectives**

**Course objectives:**

**Teaching the student an idea about fish science, its importance, the emergence of the most important fish spread locally, studying the internal and external structure of the fish, the different types of the aquatic environment and water pollution in Iraq, and the method of fish reproduction and fingerling production.**

### **Teaching and Learning Strategies**

#### **9- Course outcomes and teaching, learning and evaluation methods**

##### **A- Cognitive objectives**

- 1- Identifying the digestive, reproductive and respiratory systems of fish**
- 2- Identify laboratory equipment and how it works, such as the pH device and the oxygen measuring device.**
- 3- Identify the method of reproduction in fish and the production of fingerlings**
- 4- Identifying the external appearance of the fish and its body parts**
- 5- Learn about collecting traces of river and stream water and measuring dissolved oxygen, salinity and transparency.**

##### **B - The skills objectives of the course.**

- 1- Identifying the digestive, reproductive and respiratory systems of fish**
- 2- Identify laboratory equipment and how it works, such as the pH device and the oxygen measuring device.**
- 3- Identify the method of reproduction in fish and the production of fingerlings**

**4- Identifying the external appearance of the fish and its body parts**

**5- Learn about collecting traces of river and stream water and measuring dissolved oxygen, salinity and transparency.**

**Teaching and learning methods**

- 1. Scientific lecture.**
- 2. Discussion among students.**
- 3. Preparing reports related to the lecture**

**Evaluation methods**

- 1. Daily exams**
- 2. Ask some questions**
- 3. Giving homework**

**C- Emotional and value goals**

- 1. Benefit from scientific material in understanding the course of events.**
- 2. The ability to deal with urgent developments.**
- 3. Choose the optimal solution from among the available solutions and options.**
- 4. The ability to lead and confront challenges.**
- 5. Developing students' abilities to analyze the content of social variables to identify thinking skills and problem-solving skills.**

**Teaching and learning methods**

**Lectures, identifying and diagnosing problems through explanations, exercises, and classroom exercises, and practical applications so that students understand how to benefit from the specifications used and understand their application.**

**Evaluation methods**

**Direct questions, daily exams, stimulating students and pushing them to actively participate, discussing lectures, additional activities, semester exams, and actual attendance.**

**D - Transferable general and qualifying skills (other skills related to employability and personal development).**

**1. Improving their intellectual skills**

**2. Raising their conceptual perceptions and moving the student from the stage of teaching to learning**

**3. The tendency to cooperate and work together**

### 13. Course structure

the week	hours	Required learning outcomes	Unit name and/or topic	education method	Evaluation method
first	3 + 2	Introduction to fish production, the science of studying fish, the importance of fish, and the characteristics of fish	Introduction to fish production, the science of studying fish, the importance of fish, and the characteristics of fish	Continuous guidance of students by the professor during the lecture	Questions and answers
Second	3 + 2	The external appearance of fish, body shape, body openings, scales, and fins	The external appearance of fish, body shape, body openings, scales, and fins	Lecture and discussion	Oral evaluation
Third	3 + 2	Internal structures of fish: respiratory, digestive, reproductive, circulatory, sense organs, and urinary system.	Internal structure of fish: respiratory, digestive, reproductive, circulatory, sense organs, and urinary system.	Lecture and discussion	Student discussion
Fourth	3 + 2	Secretion and osmotic regulation of fish, nervous system	Secretion and osmotic regulation of fish, nervous system	Lecture and discussion	A short exam
Fifth	3 + 2	Classification of fish (length and weight measurements)	Classification of fish (length and weight measurements, methods used to	a lecture	questions and answers

		methods used (classify fish).	classify fish).		
<b>Sixth</b>	<b>3 + 2</b>	<b>Taxonomic characteristics of some important and common Iraqi fish</b>	<b>Taxonomic characteristics of some important and common Iraqi fish</b>	<b>Lecture and discussion</b>	<b>short exam</b>
<b>seventh</b>	<b>3 + 2</b>	<b>Methods for estimating age in fish, the relationship between length and weight in fish</b>	<b>Methods for estimating age in fish, the relationship between length and weight in fish</b>	<b>Discussion and mini-lesson</b>	<b>questions and answers</b>
<b>Eighth</b>	<b>3 + 2</b>	<b>Reproduction: reproductive strategies, factors affecting reproduction: internal and external, reproductive systems, sexual differentiation and sex differences.</b>	<b>Reproduction: reproductive strategies, factors affecting reproduction: internal and external, reproductive systems, sexual differentiation and sex differences.</b>	<b>Lecture and discussion</b>	<b>Student discussion</b>
<b>Ninth</b>	<b>3 + 2</b>	<b>Aquatic environment: physicochemical factors that affect the growth and life of fish</b>	<b>Aquatic environment: physicochemical factors that affect the growth and life of fish</b>	<b>Lecture and discussion</b>	<b>questions and answers</b>
<b>Tenth</b>	<b>3 + 2</b>	<b>Fish migration (breeding migration, feeding migration, wintering</b>	<b>Fish migration (breeding migration, feeding migration, wintering</b>	<b>Lecture and discussion</b>	<b>short exam</b>

		wintering migration).	migration).		
<b>Eleventh</b>	<b>3 + 2</b>	<b>Zooplankton and phytoplankton trophic pyramid (production stage, consumption stage, death stage, recovery stage)</b>	<b>Zooplankton and phytoplankton, trophic pyramid, (production stage, consumption stage, death stage, recovery stage)</b>	<b>a lecture</b>	<b>questions and answers</b>
<b>Twelfth</b>	<b>3 + 2</b>	<b>Fertility (absolute, relative), reproductive function</b>	<b>Fertility (absolute relative), reproductive function</b>	<b>Lecture and discussion</b>	<b>short exam</b>
<b>Thirteenth</b>	<b>3 + 2</b>	<b>Pollution: (its types and sources), its effect on aquatic organisms</b>	<b>Pollution: (its types and sources), its effect on aquatic organisms</b>	<b>a lecture</b>	<b>questions and answers</b>
<b>fourteenth</b>	<b>3 + 2</b>	<b>Water resources in Iraq: rivers, lakes, marshes, seas</b>	<b>Water resources in Iraq: rivers, lakes, marshes, seas</b>	<b>Lecture and discussion</b>	<b>questions and answers</b>
<b>Fifteenth</b>	<b>3 + 2</b>	<b>Ways to improve internal water productivity</b>	<b>Ways to improve internal water productivity</b>	<b>a lecture</b>	<b>short exam</b>

### Course Evaluation

**Distributing the score out of 100 according to the tasks assigned to the student such as**

daily preparation, daily oral, monthly, or written exams, reports ... etc

### Learning and Teaching Resources

Required textbooks (curricular books, if any)	Curriculum
Main references (sources)	Modern fish farming methods Abdel Hamid Mohamed Abdel Hamid
Recommended books and references (scientific journals, reports...)	
Electronic References, Websites	Specialized websites

### 12. Course development plan

- \* Providing academic support capabilities in organizing field visits
- \* Providing an appropriate classroom environment that enables the teacher to diversify teaching strategies
- \* Providing information technology in the campus library
- \* Hosting experts from outside the institute, or from the work environment for which they are preparing, to benefit from their expertise in developing the course according to the actual need of the labor market

### Course Description Form

This course description provides a brief summary of the most important characteristics of the course and the learning outcomes expected of the student to achieve, demonstrating whether he has made the most of the available learning opportunities. It must be linked to the description of the program.

Course Name : poultry feeding

**Course Code:**

**Semester / Year : / spring semester**

**Description Preparation Date : 2024**

**Available Attendance Forms : Section**

**Number of Credit Hours (Total) / 60**

**Course administrator's name (mention all, if more than one name)**

**Name:**

**Email:**

**Course Objectives**

**Course Objectives**

**Course objectives:**

**Teaching the student the concept of nutrition and the basic nutritional elements that birds need, learning about the energy and protein needs of poultry, how to calculate these**

	<b>needs, composition and mixing of feed, and the effect of nutrition on the production of eggs and meat.</b>
--	---

## **Teaching and Learning Strategies**

### **9- Course outcomes and teaching, learning and evaluation methods**

#### **A- Cognitive objectives**

**1- Identify the concept of nutrition, the basic elements that birds need, and the functions of these elements**

**2- Identify the concept of energy, its sources, and the relationship between energy and feed density**

**3- Identify the factors affecting the energy needs of broilers and chickens during different life stages and the symptoms of energy deficiency and excess in poultry diets.**

**4- Identifying the needs of poultry for protein and essential amino acids and the symptoms of deficiency and excess of protein in poultry diets.**

**5- Identifying nutritional and non-food additives in poultry feed**

**6- Identify the relationship of nutrition to the quality of the egg, the quality of the shell, and the quality of the egg white.**

**7- Identify the nutritional value of eggs, the quality and color of the yolk, nutrition, size and production of eggs**

#### **B - The skills objectives of the course.**

**1. Calculating the nutritional energy needs of broilers and laying hens**

**2. Calculating the digestive percentage of protein and the relationship between it and the digestible percentage of protein**

**3. Applied calculations to measure growth speed, methods used to measure growth speed of chickens**

**4. Calculating the fodder needs of poultry**

**5- Practical examples of calculating the cost of fodder for birds**

#### **Teaching and learning methods**

- 1. Scientific lecture.**
- 2. Discussion among students.**
- 3. Preparing reports related to the lecture**

#### **Evaluation methods**

- 1. Daily exams**
- 2. Ask some questions**
- 3. Giving homework**

#### **C- Emotional and value goals**

- 1. Benefit from scientific material in understanding the course of events.**
- 2. The ability to deal with urgent developments.**
- 3. Choose the best solution from among the available solutions and options.**
- 4. The ability to lead and confront challenges.**
- 5. Developing students' abilities to analyze the content of social variables to identify thinking skills and problem-solving skills.**

#### **Teaching and learning methods**

**Lectures, identifying and diagnosing problems through explanations, exercises, and classroom exercises, and practical applications so that students understand how to benefit from the specifications used and understand their application.**

#### **Evaluation methods**

**Direct questions, daily exams, stimulating students and pushing them to actively participate, discussing lectures, additional activities, semester exams, and actual attendance.**

#### **D - Transferable general and qualifying skills (other skills related to employability and personal development).**

- 1. Improving their intellectual skills**
- 2. Raising their conceptual perceptions and moving the student from the stage of teaching to learning**

### **3. The tendency to cooperate and work together**

#### 14. Course structure

the week	hours	Required learning outcomes	Unit name and/or topic	education method	Evaluation method
first	2 + 2	Learn about the concept of nutrition, the basic nutrients that birds need and their functions	Learn about the concept of nutrition, the basic nutrients that birds need and their functions	Continuous guidance of students by the professor during the lecture	Questions and answers
Second	2 + 2	Learn about the concept of energy, the main sources of energy, and the digestion and absorption of fats and carbohydrates	Learn about the concept of energy, the main sources of energy, and the digestion and absorption of fats and carbohydrates	Lecture and discussion	Oral evaluation
Third	2 + 2	Identify the relationship between energy and feed density and the factors affecting energy needs	Identify the relationship between energy and feed density and the factors affecting energy needs	Lecture and discussion	Student discussion
Fourth	2 + 2	Identify the symptoms of energy deficiency and excess in poultry diets and the energy needs of broilers and laying hens	Identify the symptoms of energy deficiency and excess in poultry diets and the energy needs of broilers and laying hens during different life stages.	Lecture and discussion	A short exam

		during different life stages.

**Course Objectives**

**Course Objectives**

**Course objectives:**

	<p>Teaching the student about the disease, its ways of spreading, the most important diseases that affect cows, calves, and sheep, and learning about diseases that affect the digestive and urinary systems, smallpox, foot-and-mouth disease, rabies, milk fever, and mastitis, their pathological causes, symptoms, and methods of treatment</p> <p>9. Course outcomes and methods of teaching, learning and evaluation</p>
--	--

## Teaching and Learning Strategies

### 9- Course outcomes and teaching, learning and evaluation methods

#### A- Cognitive objectives

- 1- Identifying the disease, its ways of spreading, and ways to control it
- 2- Identify nutritional deficiency diseases
- 3- Identify the diseases that cause miscarriage
- 4- Identifying skin diseases
- 4- Identify the diseases caused by blood parasites

#### B - The skills objectives of the course.

1. Identifying the signs of disease in general that appear on sick field animals
2. How to diagnose and treat diseases that affect animals.
3. How to diagnose and treat symptomatic diseases.
4. How to examine blood slide samples

#### Teaching and learning methods

1. Scientific lecture.
2. Discussion among students.
3. Preparing reports related to the lecture

## **Evaluation methods**

- 1. Daily exams**
- 2. Ask some questions**
- 3. Giving homework**

## **C- Emotional and value goals**

- 1. Benefit from scientific material in understanding the course of events.**
- 2. The ability to deal with urgent developments.**
- 3. Choose the optimal solution from among the available solutions and options.**
- 4. The ability to lead and confront challenges.**
- 5. Developing students' abilities to analyze the content of social variables to identify thinking skills and problem-solving skills.**

## **Teaching and learning methods**

**Lectures, identifying and diagnosing problems through explanations, exercises, and classroom exercises, and practical applications so that students understand how to benefit from the specifications used and understand their application.**

## **Evaluation methods**

**Direct questions, daily exams, stimulating students and pushing them to actively participate, discussing lectures, additional activities, semester exams, and actual attendance.**

**D - Transferable general and qualifying skills (other skills related to employability and personal development).**
